Projects

Award winning Android application and Thesis

3rd Year Project - 2018

This app was presented by me and my colleague at the 'Recursion' tech seminar held by Liberty Insurance, where it won first place 3rd year project. It is a dog walking assistant to accommodate the pairing of dog walkers and dog owners.

Unity Gaze-Tracking Software and Thesis

Fourth Year Project - 2019

This software used a webcam to track the users eye and head movements, to be used as a 'joystick' in a series of mini-games developed in unity. This involved developing a gaze-tracking API using Javascript and C#.
